DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Maxwell et al (US Patent No. 4,771,417). Maxwell et al (figs. 1, 12) teaches a control circuit configured in the form of a processor to direct the overall operation of the modem (col. 4, lines 32-44), the ability of the modem to detect errors (transients) in data transmission, the processor causes a data communication to reduce a data transmission rate from an original rate to a lower rate, a means for assessing the link parameters to detect errors in the communication system and if the modem is linked in the lowest fallback speed causes a data communication equipment to disconnect (suspend) data transmission (col. 19, lines 47-51, col. 20, lines 1-43), a central processing unit 12 and a program read only memory (ROM)14, ROM contains instructions for directing the various operations and interacts with the various modem elements over a data bus 16 and an address bus 18 (col. 4, lines 32-44) the processor evaluates whether any data is waiting for retransmission, if acknowledgement does not come within a prescribed time out period, the modem initiates recovery by establishing the link and reentering the transmit sequence (col. 19, lines 47-66).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Biedermann et al (US Patent 6,574,315), Hwang et al (US Patent 6,487,243), Bingel et al (US Patent 5,805,669), Leung et al (US Patent 4,620,294), and Engelke et al (US Patent 5,517,548) provide information related to data communications and transmission error detection considered pertinent to the instant art.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Qutub Ghulamali whose telephone number is (703) 305-7868. The examiner can normally be reached on Monday-Friday from 8:00AM - 5:00PM.
